

I'm not robot!

the program, the help files can be accessed by pressing F1. The Getting Started chapter includes a "Quick Start Steps" section that provides an overview of the steps required to start using the program. Download Links: Windows 32-bit: Windows 64-bit: Note: The 32-bit version of Builder will run on both 32 and 64-bit versions of Windows. However, the 64-bit version will be able to take advantage of all available installed memory to process larger data files. If you're not sure which version of Windows you have, you can check the System settings under the Control Panel. Both the 32 and 64-bit versions are compiled from the same code and are functionally identical, including the project (.gpstrat) files they generate. Because they're the same program, only one may be installed on the same computer. If your computer runs 64-bit Windows, it's strongly recommended that you install the 64-bit version. For 32-bit Windows, install the 32-bit version of Builder. The vast majority of users should install the 64-bit version. The 32-bit version will only be necessary if you have an old version of Windows, such as XP, and/or an older computer. Since Builder is very computationally intensive, older hardware is not recommended. User's guide for Builder 1.7.2 For best results, save the installation file first before running it. Make a note of the location where the file is saved on your computer. After the download is complete, locate the .exe file and double-click it to start the installation. Follow the prompts to complete the installation. Note: if Windows flags the program as "unsafe", click the "More Info" button and select the option to install it anyway. After installation, the Builder program icon should appear on your desktop and in the programs list in your start menu. By default, the software is installed in the folder Program Files\Adaptrade Software\Adaptrade Builder x.x.x, where x.x.x is the version (e.g. 3.0.0). The example strategies are located in the Examples folder, which is also in the installation folder. After opening the program, the help files can be accessed by pressing F1.
